

First of all,remove plastic clip that comes installed with Bosch wiper blade.

Here is Wiper Arm, Bosch blade and plastic clip.

Insert plastic clip part way into “U” form of wiper arm, taking care not to push slot too far, so the bottom part of “U” form doesn’t cover it.(see 2 pics above)

With clip in position,offer the Bosch wiper blade underneath.so pin in wiper will line up with slot in plastic clip. (pic above)

Push plastic clip and wiper arm into blade until pin clicks into position of plastic clip.

Pull wiper blade until plastic clip sits in the “U” form of wiper blade securely.(above 2 pics)
